Letter of Recognition

Dear [REDACTED] Rizq [REDACTED] Khairulnizam,

Date of Issue: June 4, 2026

Congratulations! This letter serves as confirmation that you have fulfilled the requirements to receive a Letter of Recognition, offered by the College of Information Sciences and Technology at Penn State University.

The purpose of this letter is to explain what the recognition means and offer advice for using it on your resume and in future job interviews.

You have received instruction in cybersecurity and related courses and earned a degree from an institution designated as a National Center of Academic Excellence in Cyber Defense Education by the National Security Agency and the Department of Homeland Security.

In plain English, this means that these courses have been examined in detail by CAE Program – syllabi, topics, labs, assignments, and readings. They have been judged to meet or exceed the Cyber Defense Education (CDE) standards.

This recognition should be listed as a bullet item on your resume where you mention your graduation.

In an interview, you should be prepared to discuss these courses and explain that they have been examined through the CAE Program of Study Validation. It is also suggested that you review the courses you have completed before an interview, so you are prepared to say a few words about them.

Here is the list of courses evaluated through the CAE Program of Study Validation:

- IST 210, 220
- CYBER 221, 451, 454, 456
- SRA 111

Most companies and organizations will not be familiar with this recognition, so you should be prepared to explain that this provides a quality check on the above courses and demonstrates that the Cybersecurity program at Penn State has been examined and determined to meet or exceed CAE Community expectations for cybersecurity education.
